

Fairy Light Chains at Christmas, Roller Chains All Year Round

Chains are available in a huge variety: as jewelry, fairy light, ring chain and more. However, if you require a chain solution for power transmissions, the roller chain is the best choice and Nozag is your best partner. For the other chains visit a do-it-yourself market or a jewelry store. For centuries roller chains have been the most useful and reliable power transfer over distances. The scope of functions and applications is virtually unlimited.

Nozag's product line includes a wide range of chains that meet many different requirements, from maintenance free to corrosion-resistant, and they provide optimal conditions for power transmission (uniform or non-uniform and intermittent). We are happy to help you with the calculation of the suitable type of chain.

Nozag Roller Chains for High Demands

Let us know your needs or assembly situation! We provide advice and will be happy to supply you with the perfect roller chain for your needs. No matter if you require standard chains, special designs or tailor-made solutions, Nozag is able to supply any product within a short time. The product range includes the following special chains:

Roller Chain Delta HR

This chain features increased resistance to wear and abrasion; linking elements and link-plates with grit-blasted surface, biconical bushing, closed reels and pins with «Easy Break». This type of chain is pre-stretched and comes with a factory-set wax lubrication and it can easily be re-lubricated.

Roller Chain Delta Titanium – Corrosion-Protected

This type of chain offers the high basic quality of the Delta HR roller chain, but with an additional high-grade corrosion protection, i.e. the link-plates have an extra Delta ZED coating.

Roller Chain Delta Verte – Maintenance Free

The model Delta Verte is entirely corrosion-protected and maintenance free. Although no lubrication is required, the chain may be used in water or in damp areas. The temperature range for applications is from -30°C to 80°C.

Roller Chain INOX HR – Fit for the Food and Chemical Industries

Stainless linking elements and link-plates as well as closed reels make the chain INOX HR especially suited for the food industry and aggressive chemical applications. Moreover, it offers a higher load capacity. Information on specific requirements as to lubrication is available on request.

In addition to these special chains, simple and economic chain solutions are available to suit your specific requirements. Tell us your individual needs and expectations and we'll find the perfect roller chain for you.

Christmas / New Year Holidays

Our business will be closed from
**21 December 2013 to 5 January
2014.** Nozag wishes you Happy
Holidays.

Sprockets – Optimal Interaction with Roller Chains

To fit your chains, you will find at Nozag a broad range of sprockets, chain wheels and appropriate assembling accessories and equipment.

- Sprockets with number of teeth from 8 to 150, single, double or triple row
- Custom-made according to your specifications, ready for installation
- Compatible with European and American chain types
- Available in various materials (steel, stainless steel, plastic...)

We are happy to assist you with the calculation of the optimal design. Here you can find the details about sprockets.
